

CS23007 FATIMA SHAHID

main.c

Run

Share

```

61 printf("\nProcess\tPSize\tHole");
62
63 for(i = 0; i < np; i++) {
64     if(p[i].flag != 1)
65         printf("\nP%d\t%d\tNot allocated", i, p[i].size);
66     else
67         printf("\nP%d\t%d\tH%d", i, p[i].size, h[p[i]
        .holeid].id);
68 }
69
70 printf("\n\nHole\tActual\tAvailable");
71 for(i = 0; i < nh; i++) {
72     printf("\nH%d\t%d\t%d", h[i].id, h[i].actual, h[i].size
73 );
74 }
75 printf("\n");
76 return 0;
77 }

```

Output

Clear

```

Enter the number of Holes : 4
Enter size for hole H0 : 12
Enter size for hole H1 : 2
Enter size for hole H2 : 22
Enter size for hole H3 : 30

Enter number of process : 3
Enter size of process P0 : 13
Enter size of process P1 : 1
Enter size of process P2 : 4

Best Fit

Process PSize Hole
P0 13 H2
P1 1 H1
P2 4 H2

Hole Actual Available

```
